💼 PROFESSIONAL EXPERIENCE

Confledis
Full stack developer intern
08/2023 – 09/2023 | Paris, France
- I built with my team a mobile app with user-friendly
  interface that allowed users to search and locate
  doctors, schedule appointments, discover nearby
  laboratories, and identify hospitals within their
  preferred geographic regions.
- I collaborated closely with the remote development
  team, effectively communicating project goals,
  progress, and milestones to ensure a coordinated and
  successful development process.

TECH STACK : Reactjs,Ionic,Styled-components,Css.

Agri4.0
Full stack developer intern
02/2023 – 06/2023 | Agadir, Morocco
- I built a fullstack app in the consulting field which
  was a marketplace that link consultants with
  companies .
- I built a frontend app in the farming industry where
  farmers can monitor and control their Bees ,I worked
  with a backend dev in this project.
- I built a frontend app in GIS field,the idea of the
  project is that users can choose any location in the
  world then they will get the ndvi ,ndwi... layers for
  this place plus a history of layers values, all this using
  sentinel hub api,I collaborated with a GIS engineer in
  this project.

TECH STACK: Tailwindcss,Reactjs,
Nodejs,Express,Mongodb
